ITC Project Collaborative Reports (Total = 22)

1. ITC Project, World Health Organization, and World Heart Federation (2012, April). *Cardiovascular harms from tobacco use and secondhand smoke: Global gaps in awareness and implications for action*. Waterloo, Ontario, Canada and Geneva, Switzerland.
 English: <https://itcproject.org/findings/reports/cardiovascular-harms-tobacco-use-and-secondhand-smoke-global-gaps-awareness-and-implications-action-april-2012/>
 This report was commissioned by the World Heart Federation and written by the International Tobacco Control Project (ITC Project), in collaboration with the World Health Organization. It presents data from two major global tobacco research and surveillance studies - the Global Tobacco Surveillance System (GTSS) and the ITC Project, which converge in their conclusion that are significant gaps in public awareness in many countries regarding the cardiovascular risks of tobacco use and secondhand smoke. This report was released at the World Congress of Cardiology, Dubai, United Arab Emirates in April 2012, in both English and Chinese.
2. ITC Project and World Health Organization, Western Pacific Region (China) (2014, April). *Tobacco health warnings in China: Evidence of effectiveness and implications for action*.
 English & Chinese: <https://itcproject.org/findings/reports/tobacco-health-warnings-in-china-evidence-of-effectiveness-and-implications-for-actions-april-2014/>
 Joint report of the WHO China Office and the ITC Project, which presented the evidence from the ITC China Project on the low effectiveness of tobacco health warnings in China. This report was released in Beijing at the WHO China Office in April 2014.
3. ITC Project and British Heart Foundation. (2014, December). *Standardised Packaging for Tobacco Products: Recent evidence from Australia and United Kingdom*.
 English: <https://itcproject.org/findings/reports/standardised-packaging-for-tobacco-products-itc-project-british-heart-foundation-report-december-2014/>
 This report summarized the evidence (including ITC evidence) on plain packaging. It was created to support the United Kingdom in their efforts to implement standardized packaging. The report was quoted by Baroness Tyler of Enfield during the standardised packaging debate in the UK House of Lords on March 11, 2015. The House of Commons voted in favor of standardised packaging and the regulations were approved on March 16 and came into force on May 20, 2016.
4. Nargis, N., Stoklosa, M., Ikamari, L., Ong'ang'o, J.R., **Fong, G.T.**, Drope, J., Kimosop, V., & Chaloupka, F.J. (2015, October). *Cigarette taxation in Kenya at the crossroads: Evidence and policy implications*. University of Waterloo, Waterloo, Ontario, Canada.
 English: <https://itcproject.org/findings/reports/cigarette-taxation-kenya-crossroads-evidence-and-policy-implications-oct-2015/>

This special ITC report was prepared in collaboration with the American Cancer Society, International Institute for Legislative Affairs, Kenya, and University of Nairobi. It provided a timely analysis of ITC Kenya data of the impact of staying with a uniform excise tax structure vs. reverting back to a tiered structure. This report was released during the parliamentary debate between the President of Kenya (who favored the uniform structure, which theory and our analysis finds to be superior) and the Parliament (which favored going back to the tiered structure, creating more opportunities for tax avoidance, leading to greater consumption and prevalence, with lower generated revenue). The President prevailed in this debate.

5. ITC Project and World Health Organization, Western Pacific Region (China) (2015, October). *Smoke-free policies in China: Evidence of effectiveness and implications for action*. English & Chinese: <https://itcproject.org/findings/reports/smoke-free-policies-in-china-evidence-of-effectiveness-and-implications-for-action-oct-2015/>
The ITC Project collaborated with the WHO China Office and the China CDC to produce a report that presents evidence from three waves of the ITC China Survey from 2007–12 documenting the low effectiveness of smoke-free laws in China, contrasted with the very high effectiveness of comprehensive smoke-free laws in other ITC countries. The report, factsheet, and infographics were produced in English and Chinese.

3. ITC Project (2016, August 31). *Health Canada Consultation on “Plain and Standardized Packaging for Tobacco Products*. This submission provided evidence from Australia, the UK, and France on tobacco industry packaging and labelling tactics used to maintain/increase brand appeal in response to plain packaging legislation in these countries and recommended strong measures to curb the use of deceptive packaging and labelling. The submission recommended refreshing the content of Canada’s pictorial warnings, increasing the size of warnings from 75% to 90%, restricting the shape of packs to the slide-and-shell format, and standardizing the maximum length and diameter/width of cigarettes and provided evidence to refute industry arguments that plain packaging would increase illicit trade.
4. ITC Project. (2017, April 13). *Seizing the Opportunity: The Future of Tobacco Control in Canada*. Response to Health Canada’s Consultation Document on the Future of Tobacco Control in Canada. This submission provided data from ITC Canada Surveys (2002-2016) to demonstrate considerable support among smokers for the implementation of new and stronger policy measures that could be considered within a tobacco endgame strategy.
5. Fong, G.T. and Craig, L.V. (2017, October 5). This letter urged Health Canada to maintain the requirement for slide-and-shell packaging in the final standardized packaging regulations as the only standard packaging design in Canada. The letter was written in response to mounting tobacco industry pressure to remove the slide-and-shell packaging requirement in the final regulation.

9. Craig, L.V. (2018, September 6). *Response to proposed Tobacco Products Regulations (Plain and Standardized Appearance)*. Published in Canada Gazette, Part 1, Volume 152, Number 25 on June 23, 2018. Submitted to Health Canada. This submission urged Health Canada to fully implement plain packaging legislation as proposed in the regulations, particularly the requirement for slide-and-shell packaging, the application of the regulation to all tobacco products, and standardization of the length and diameter of cigarettes.

10. Chung-Hall, J., Craig, L., Fong, G.T. (2019, January 3). *Consultation on New Health-related Labelling for Tobacco Products*. Report submitted to Health Canada in response to call for submissions. This submission presented ITC evidence on the declining impact of Canada's pictorial health warnings, the impact of adding and removing health messages, and summarized recent studies on the impact of placing health warnings directly on cigarette sticks.
11. Chung-Hall, J., Craig, L., Fong, G.T. (2019, March 22). *Consultation on Potential Measures to Reduce the Impact of Vaping Products Advertising on Youth and Non-users of Tobacco Products*. Report submitted to Health Canada in response to call for submissions. The submission presented evidence from the ITC Canada 2016 and 2018 surveys on attitudes towards regulations for e-cigarette advertising and youth access, sources and use of e-cigarettes, and exposure to various forms of e-cigarette advertising. The submission recommended the implementation of a comprehensive ban on advertising of vaping products in media and locations that are accessible to youth and young people, while ensuring that vaping products remain attractive to adult smokers who want to quit.
12. Chung-Hall, J., Craig, L., Fong, G.T. (2019, May 17). *Consultation on Reducing Youth Access and Appeal of Vaping Products: Potential Regulatory Measures*. Report submitted to Health Canada in response to call for submissions. This submission presented data from the ITC Canada 2018 survey on the prevalence of vaping, reasons for vaping, salience of health warnings and support for policies to regulate the contents of vaping products. Recommendations included a comprehensive ban on advertising and promotion of vaping products in media and public locations that are accessible to youth and young people, strong enforcement of the promotion of flavoured vaping products, the implementation of campaigns to educate youth about the potential harms of vaping, and the introduction of health warning on all vaping products and packaging.
13. Craig, L., Fong, G.T. (2019, September 5). *Response to Health Canada call for submissions on the Vaping Products Labelling and Packaging Regulations Impact Analysis*. Published in Canada Gazette, Part 1, Volume 153, Number 25 on June 22, 2019. Submitted to Health Canada. This submission summarized evidence from two recently published ITC papers evaluating the impact of health warnings on nicotine vaping products. The findings provided evidence of low impact of the mandated text warnings in England and the Netherlands.
14. Chung-Hall, J., Craig, L., Fong, G.T. (2019, October 15). *Submission to Docket No. FDA-2-19-N-3065 for "Tobacco Products; Required Warnings for Cigarette Packages and Advertisements"*. This submission presented new ITC analyses of the impact of pictorial health warnings addressing the same smoking-related harms covered in the pictorial health warnings proposed by the US FDA. The findings showed increases in smokers' knowledge of these health effects after pictorial warnings addressing these harms were introduced in 13 ITC countries. The submission estimated that between 3 and 6 million additional US smokers would be aware that smoking causes certain health conditions if pictorial warnings were implemented.
15. Fong, G.T. (2021, March 3). *Consultation - Proposed Concentration of Nicotine in Vaping Product Regulations*. Submitted to Health Canada. This letter was written to inform Health Canada colleagues about forthcoming data from the ITC Canada Four-Country Survey (2020) on trends and correlates of support for nicotine reduction in cigarettes and e-cigarettes, the association of nicotine vaping product use and quitting, and other policy-informing topics.

16. ITC Project. (2021, April 5). *Impact of Canada's Menthol Ban on Quitting: Implications for California*. Factsheet. <https://itcproject.org/findings/fact-sheets/april-5-2021-impact-of-canada-wide-menthol-cigarette-ban-on-increasing-quitting-implications-for-california/> Prepared for advocates against Proposition 31, which was designed to undo Bill 793, the 2020 law that banned flavored tobacco products. This factsheet provided projections that if a menthol cigarette ban were to be implemented in California, based on the Chung-Hall et al. evaluation of the Canadian menthol cigarette ban, 49,232 California smokers would quit, among whom 12,354 would be Black/African American smokers.
17. ITC Project. (2021, April 5). *Canada's Menthol Ban Did NOT Increase Illicit Purchasing*. Factsheet. <https://itcproject.org/findings/fact-sheets/apr-5-2021-the-canada-wide-menthol-cigarette-ban-did-not-increase-illicit-purchases-english/> This infographic/factsheet was created to accompany the publication of the Chung-Hall et al. (2021) article in *Tobacco Control* evaluating the Canadian menthol cigarette ban, showing that illicit purchasing did not increase after the ban.
18. ITC Project. (2021, April 25). *ITC Evaluation of Canada's Menthol Ban*. Infographic. <https://itcproject.org/findings/fact-sheets/apr-26-2021-the-itc-project-evaluation-of-the-canadian-menthol-ban/> This infographic/factsheet was created to accompany the publication of the Chung-Hall et al. (2021) article in *Tobacco Control* evaluating the Canadian menthol cigarette ban.
19. ITC Project. (2021, April 28). *Impact of Canada's Menthol Ban on Quitting: Implications for the United States*. Factsheet. <https://itcproject.org/findings/fact-sheets/apr-28-2021-impact-of-canadas-menthol-ban-on-quitting-implications-for-the-united-states/> This factsheet described the Chung-Hall et al. (2021) evaluation of the Canadian menthol cigarette ban and used the effect size of the ban on increasing quitting to produce projections of the impact of a U.S. menthol cigarette ban on quitting. The projections were that a menthol cigarette ban in the U.S. would lead to an increase in quitting among daily smokers of 923,790, of whom 231,628 would be Black/African American smokers. These estimates were cited in the FDA's announcement on April 29, 2021 that they would be proposing a rule to ban menthol cigarettes within the next year. (<https://www.fda.gov/news-events/press-announcements/fda-commits-evidence-based-actions-aimed-saving-lives-and-preventing-future-generations-smokers>). These estimates of the impact of a U.S. menthol cigarette ban were updated in April 2022; see below.
20. Fong, G.T. (2021, July 7). *Letter in support of the adoption of point-of-display ban for tobacco products*. Submitted to the Government of Peru. WHO Region of Americas and global tobacco control advocates alerted us to the proposed bill in the Peruvian Parliament to ban tobacco advertising, promotion, and sponsorship, in line with FCTC Article 13. We supported this bill by preparing a letter to the Government summarizing the research evidence showing the positive impact of such bans/restrictions in other countries.
21. Fong, G.T., and Craig, L.V. (2021, September 1). *Response to Health Canada Gazette, Part 1, Volume 155, Number 25: Order Amending the Schedules 2 and 3 to the Tobacco and Vaping Products Act (Flavours)*. Submitted to Health Canada. . This submission provided evidence from a submitted paper by Gravely et al. based on ITC Canada 2020 Survey data on vapers' support for a ban on flavoured nicotine vaping products and their potential reactions to a flavoured vaping product ban. The submission also provided unpublished data on use of flavoured vaping products, reasons for using vaping products, and use of flavoured vaping products to quit.
