061a	BR333	<p><b>Interviewer Training and Instructions for Brand question:</b></p> <p><i>Emphasize "specific" in the question. If respondent gives a brand name that could fit several different entries in the coded list, probe as necessary for other descriptors, to determine whether any of the listed varieties matches the respondent's answer. If the response is vague or nonspecific, prompt respondent by saying: "What is the name you use when you ask for your brand in the store?" Always confirm your choice with the respondent: e.g. "There is a brand on my list that says "Basic Ultra Light Menthol 100s" -- would that be the same as your brand?" or "Would that be the brand you smoke most?" If the respondent's answer exactly matches the name on the list, simply read back the brand name as confirmation: e.g. "So your brand is Benson &amp; Hedges Menthol Mild King Size".</i></p> <p><i>INTERVIEWER TRAINING -- Examples of probing:</i></p> <p><i>For all countries, the varieties listed for the respondent's brand family will suggest the kind of probing is most likely to be useful.</i></p> <p><i>In CA and US, where the typical strength descriptors "light" and "mild" are still in use, ask "Is your brand any particular strength, or isn't that part of the brand name?" If respondent says "just regular strength" or "the plain kind" or "full flavour", confirm that he/she smokes the default strength: "So there's no mention of strength in your brand's name?" Sometimes "full flavour" is actually part of the brand name and sometimes it is unmentioned because it is the default strength.</i></p> <p><i>This same kind of probing applies also to cigarette length – the shortest length for a given brand family will generally be the default length and may not be mentioned by the respondent, but the interviewer should explicitly confirm this with the respondent: "you didn't mention what length your cigarette is. Would that be [regular/ King size...] that you smoke?"</i></p> <p><i>IN UK and AU, manufacturers have completely abandoned strength descriptors like "light" and "mild", and in CA and US they are moving in this direction now too. Tobacco companies are using other words to discriminate among varieties, terms like colours (blue, white, silver, gold, etc) or words like "fine" or "smooth" or "distinct". The respondent may not mention these terms if the probing is explicitly for strength. Therefore in UK and AU the following probing should be used instead. In CA and US this should be used if the respondent's brand family (e.g. Marlboro, Craven A) shows the new terms in its listed varieties, and/ or if the respondent doesn't have strength terms to identify his/ her usual brand variety (because new descriptors may have been recently introduced for more brands than are shown).</i></p> <p><i>Interviewers should say: "Are there any other words that help identify the name of your brand?" OR "How do you ask for your specific brand in the store?" If the response could fit several different varieties on the list, ask specifically: "Would that</i></p>

Q#	VarName	4C7-P
		<p><i>be Pall Mall gold or Pall Mall white, or something else?" In the brand lists for UK and AU, these non-strength descriptors have been treated like strength descriptors, in that they immediately follow the brand family's name in the variety's listing.</i></p> <p><i>If the description offered by the respondent isn't specific enough and therefore fits both two varieties – e.g. menthol and non-menthol entries -- probe by saying: "Is that menthol or not menthol?" Similarly, if the description could apply to entries for multiple lengths – e.g. King Size and 100s -- probe by saying: "Do you smoke King Size or 100s, or some other length?"</i></p> <p><i>In other words, use the names of the listed entries – within the mentioned brand family -- to probe for details, and thus to narrow down the options and identify the one code that fits the respondent's answer – if there is one. Confirm that variety with the respondent. If no entry matches, or if respondent does not confirm the entry you think is closest, then code "other" and enter respondent's answer as a text response.</i></p>

136a	SM200	<i>Interviewer Training Notes on Classification of Stop-smoking Medications:</i>  <i>1. There is confusion between NRTs (Nicotine replacement therapies/ products) and prescription (Rx) medications, mostly because patients often get NRTs with a doctor's prescription. The availability of NRTs without a prescription varies over countries. If a medication is a nicotine replacement product, we want it to be classified as NRT regardless of whether or not a prescription was used to obtain it. By "prescription meds" we mean pills that do not contain nicotine and always require a prescription.</i>  <i>2. NRTs come in various forms, like patch, gum, lozenges, spray (see list in survey); some NRTs are in tablet form, but they are placed under the tongue rather than swallowed. Prescription medications are always pills and are always swallowed. Probe for this kind of information if the respondent doesn't know whether his/her med is NRT or prescription.</i>
136b	SM201	<b>Ask if 134a/SM161=1.</b> <i>We are interested in their MOST RECENT use of medications FOR THE PURPOSE OF QUITTING SMOKING. We can't use BRAND of nicotine product (e.g., Nicorette). We want the FORM of NRT (e.g., gum, patch). Prescriptions are shown with both brand and generic names. If respondent mentions a product not listed, probe to classify as either NRT or prescription (see interviewer training notes). Use "other" only if medication cannot be classed as either NRT or prescription. "Quitting" refers to the first 3 months after they actually stopped smoking. Anything beyond those first 3 months is considered to be "staying quit."</i> <i>Do not read out products, unless necessary. 		<p>Thank you very much for your help. As we mentioned before, we are conducting this four country survey again in the future -- about once a year. So in [current month] of [next year], we will be contacting you again to set up a time for the next survey. Prior to calling you, we will be sending you another cheque for [payment amount], as a token of our thanks.</p> <p>In order to make sure that this [payment] for the next survey reaches you, we would like to keep your contact information up to date. Do you anticipate that your address or phone number will change at any time over the next year?</p>
224b	AI521	<p>We have also found it helpful in recontacting people to obtain the name and phone number of someone not living with you, such as a close friend or a relative, who can help us in case we are having trouble contacting you.</p> <p>The last time we spoke you provided [contact's name] and their phone number--[contact's phone number]. Is this still the best contact person and phone number?</p> <ol style="list-style-type: none"> <li>1 Yes</li> <li>2 No</li> <li>7 Not applicable</li> <li>8 Refused</li> <li>9 Don't know</li> </ol>
224c	AI522	<p><b>Ask if 224b/AI521=2.</b>          Could you please provide the name and phone number of that person for you?  <b>If response=1, go to 224d/AI525.</b>  <b>Otherwise, go to 224e/AI533.</b></p>
224d	AI525	<p><b>Ask if 224c/AI522=1.</b>  <i>Record name and phone number of new contact.</i></p>
224e	AI533	<p><b>Ask if 006a/BI229=2.</b>          As I mentioned to you at the beginning of the survey, we have sent you a cheque for [payment amount]. Please call us at this toll free number in case you have not received the cheque by next week: 1-888-483-3244.</p>
224f	AI535	<p><b>Ask all.</b>          Thank you again, and we look forward to talking to you in about a year and a half.</p>

## VarName Changes

New Name	Old Name	Date	Survey	Changed By	Authorization	Reasoning	Source
SO416	SO412	11/26/2014	4C7-P	Michelle M	Ruth Loewen	This Varname correction for 4C7-P was supposed to occur in 2009 but for some reason did not. Changed now retroactively so it's consistent with the rest of 4C surveys. (It's possible the 4C7 dataset already correctly used SO416.)	
PS213	PS214	4/1/2015	4C7-P	Ruth L	Lorraine C said it would be safer and simpler to have one varname instead of both PS213 and PS214 for the generic (not YOUR) wording.	PS208, PS213, and PS214 were all being used for a mix of two wordings: 'cigarette smoke is dangerous to non-smokers' and 'YOUR cigarette smoke is dangerous to non-smokers'. PS208 was retained for the 'YOUR smoke' version, because there was documentation of that intention. PS213 was retained for the generic 'smoke is...' version, and PS214 was deleted entirely.
